

## Christmas 2025

The Golden Age of America has started, and the Philsons are smack dab in the middle of the ascension. Due to my son Daniel's work on the Trump campaign, he was selected as

Under Secretary of Homeland Security. His key focus was on leading the charge in deportation of illegal aliens. Working hand and hand with Kristi Noem, they've done an excellent job at making a dent in the numbers of gang members on the streets. This is a tough job and Daniel suggested that the Trump Administration add me as a part of the team.

Having served as Biden's Spending Czar, I was overqualified as I had also been Trump's Secretary of Dream Killing. I was hired to assist with ICE Raid coordination (killing the dreams of Democrats padding the voting roles). On a second project, I was also reviewing all the Epstein files to kill the dreams of Democrat's in that space as well.

To get some intel on ICE protestor's motivation and "follow the money" of the paid agitators, I asked Daniel to go undercover as a protestor. Daniel made his own sign to blend in. He didn't get the memo and had a Pro-ICE message. He stuck out like a sore thumb! To blend in, he found the only other person with a positive ICE sign, Mary Welch. Mary had been victimized by illegal aliens at a Taco Bell location. She had asked for a taco with NO tomatoes, and they got her order wrong. She is a true patriot. They began to talk and shared stories of landscapers trimming hedges unevenly and having fruit improperly picked in their gardens, and other violations they had experienced...It was true love and they are now dating.

Georgia was no longer taking care of Joe Biden but did some ICE freelancing. We did a work date on one occasion and that was fun. Busting heads of protestors and Antifa followers. Over 40 years of marriage and still crushing today's youths. It brought back memories of raising our kids! No "Time Out policy" in our day...just a firm back of the hand.

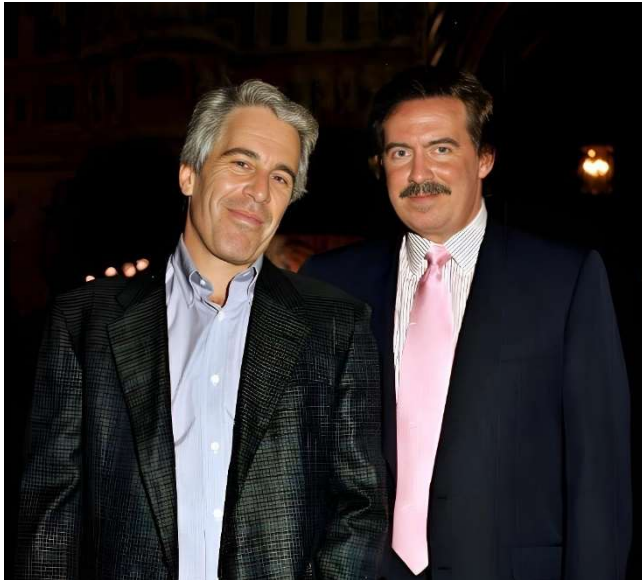

Based on Georgia's knack at always winning fights with me, Trump asked her to take a more permanent role in the State Department working with Rubio's War Party. This was a team of people whose goal was to stop conflicts around the globe. Her first success was to have Rosie O'Donnell relocated to Ireland. It stopped conflict for the moment, but we know that war will breakout soon in Ireland. She worked on Israel and Gaza, Russia and Ukraine and is now working with Zohran Mamdani and Common Sense...a fight that looks unwinnable.

*Trump reviews Georgia's strategy to align the Crips and the Bloods.*

The Epstein Files were delayed for release partially due to my involvement. I had a history with Epstein that was quite positive. I was young, single, and looking for love. We had met

at a Chuck E. Cheese party for one of my co-worker's daughters. Not usually a pickup joint but there were a lot of single moms in attendance.

Where I was interested in women of my own age, Jeffrey was spending his time entertaining the little girls invited to the party. While he wasted his time chatting with 14-year-olds, I chatted with their moms. No luck for me, but a friendship was struck.

He invited me to his island in the Virgin Islands and as a young professional making nearly \$20,000 annually, this was such a deal. I got on board and aside from Jeff, there was only one other guy on the plane...Prince Andrew from the UK. Everyone else was 16–18-year-old girls. Jeff assured me that I'd find a woman on the island.

The flight experience was like my afternoon at Chuck E. Cheese. Jeff and Andrew spent all their time chatting with the young girls while I found the only adult woman in the group, Giselle Maxwell.

She was interesting but seemed to be preoccupied by every move Jeff and Andrew made.

Once on land, I got settled in and there she was, Georgia Johnson. But Prince Andrew had beat me to her. He asked her age and then was turned off by her reply. Thank God for that.

I took this photo and then he walked away. Georgia and I hit it off and the rest is history as they say,

Sorry for that trip down memory lane, but it now seems “historic.” The reading of the files had me looking for Trump involvement but there was nothing. As a former Secretary of Dream Killing, the release of the files was a slam dunk on killing the Democrat’s dream of a scandal involving Trump who likes the ladies, but not the girls.

Poor Prince Andrew wrote me a note from the UK the other day wishing me well and asking for a place to

stay. I heard he had been stripped of his title and is now Andrew Mountbatten-Windsor. We really didn’t want him around (as we have a grandchild), so I told him we lived within one mile of a public school to get him off our backs.

Regarding Cory and Whitney, after their failed Harris campaign, they had bought an island...Big Mistake. They found out it was Epstein Island, and it was seized by the government. They are looking for work, but waiting for something in politics, maybe the 2028 Presidential run with Gavin Newsom or back with Kamala Harris.

Skyla and Maggie lost their Secret Service positions after that Butler incident but did a bit of Drone work that led to a job “spotting” for the US Coast Guard/Navy for drug cartels moving drugs by sea. Maggie was excited to give the order to “Strike” and blow up the first of several drug boats. They are currently positioned off Venezuela in an undisclosed area.

It's been a wonderful year for the Philsons and America. Things are starting to turn around and the jobs we have seem secure for now. Pray that Whitney and Cory find meaningful work, so they don't displace an illegal alien from a fast-food position.

We hope you are having an equally exciting year and hoping that your new year is blessed.

**Merry Christmas from the Philsons**
